The Blu-Ray DVD has the best video (1080p) and audio quality but requires a Blu-Ray DVD player, or a game console capable of playing Blu-Ray Disks

The Digital Download also has high definition (1080p) resolution and can be played on any web connected device such as a phone, tablet, laptop or desktop computer. It can be downloaded to a laptop or desktop computer. If you have "smart" TV you may be able to screencast it from your device to the TV.

The Standard Definition DVD has the poorest resolution (480p) and does not display a high resolution image but can be played on a standard DVD player and some computers.
